

Innovations in 2020

What's new in the world of wedi systems

The practical benefits for you are paramount

Honest opinions lead to product innovations

There is nothing more valuable than an honest feedback from a customer. This is exactly why close cooperation with installers, contractors and architects is so important for wedi – to suit new requirements, a dynamical adaptation of product solutions we offer for bathrooms and wet rooms is necessary. A good example: wedi Top Line. After the successful launch of the Fundo Top and wedi Top Wall design surfaces, the market very quickly demanded expansion of the range. No sooner said than done – the new product portfolio provides two additional colours and new, pre-formed ready-to-use surfaces for wedi functional design elements. The brand new wedi Top Line and many other new products can be found in this brochure.

wedi Top® Line

Stylish design surfaces for the shower and bath. With the new wedi Top Line, wedi offers a broad product portfolio of ready-to-use surfaces now in a total of five colours – a homogeneous pure white and four additional textured shades with a natural stone resemblance. The product line is already established on the market by a range of Fundo Top surfaces perfectly matched to wedi Fundo shower elements Primo, Plano and Riolito neo and a range of wedi Top Wall design surfaces for the cladding of walls and other vertical surfaces. Expanding the line further in 2020, new pre-formed surface solutions are added to match wedi functional design elements such as the wedi Sanoasa bench 3, wedi I-Board or wedi Sanwell Niches.

All ready-to-use surfaces are perfectly tailored to the corresponding wedi element, which means: no looking around for individual items, different tools and accessories, instead find everything in one place and benefit from a quick and easy installation and a guaranteed reliability in the wedi system. The seamless design surfaces are particularly easy to clean and can be tailored to the requirements on site using a standard hand tool. The new wedi Top Line is indeed the perfect alternative to traditional tiles that always fits.

Available in the colours:

Homogeneous,
pure white

wedi Sanoasa® Shine

Exclusive wellness loungers with an extravagant design coating. For the sophisticated private bathroom or public wellness facility both internal and external areas the wedi Sanoasa Shine range offers comfortable loungers in five different shapes. The high-quality varnish, applied in a multi-layer process, can be produced in approx. 200 UNI colours (RAL) or with a mother-of-pearl effect, makes each lounger a refined designer furniture element. The surfaces are seamless and are therefore particularly hygienic and easy to maintain.

The best thing: they can be used as soon as they've been set up – without any installation effort. Thanks to their low weight, they can be re-positioned as and when required.

wedi Sanoasa® floating bench

Comfortable seating options in the desired size. The spacious bench in the wedi Sanoasa range is attached on three sides without any substructure thus designed to be floating. The special bit: the length of the tileable bench element can be crafted with millimetre precision between 1,500 and 3,000 mm. A square element is available for the connection of two benches allowing for a corner or a U shaped seating solution. For even more comfort, a hot water heating system can be integrated into the bench structure. All tools needed for installation are included in the scope of delivery – for a particularly quick and easy installation.

wedi Sanbath® floating wash basin with channel

The floating wash basin with linear drainage is available in any width between 500 and 1,300 mm. In addition, there are four channel lengths (300, 700, 800 and 900 mm) to choose from and the type of channel cover (standard, exclusive, tileable) can also be individually specified. It has brackets integrated in the factory to make installation a lot easier – screw on, tile, done!

Floating structure,
load capacity up to 150 kg

wedi I-Board® Plus WC dry wall installation cladding

Especially for plaster and mosaic tiling. The new wedi I-Board Plus combines all the benefits of the tried and tested wedi I-Board but has an additional reinforcement plate integrated in the factory. As a result, the pressure load from the attached WC ceramics is perfectly offset so that the dry wall installation can be individually tiled with mosaic from 2 x 2 cm or plastered.

Fundo Plano® complete shower element

Relaunch of the slimmest wedi complete system. The Fundo Plano shower element has been optimised based on the wishes of wedi customers. The previously square extension collar now has a round shape and can be shortened to the desired size more quickly and easily as a result. In addition, the odour trap is even easier to remove. With an installation height of just 65 mm, the new Fundo Plano remains the slimmest wedi complete system with integrated drain and is thus particularly suitable for old building renovation, where every millimetre counts. Extra tip: the Fundo Plano complete system can be combined with the matching new Fundo Top Plano design surface.

Perfect for renovations,
with a depth of just 65 mm

With new extension collar and
improved odour trap

Fundo RioLigno and wedi Fundo® channel drain substructure element

The shower element with linear drainage especially for suspended timber floors. The Fundo RioLigno is a complement to the Fundo Ligno shower element that has been established on the market for many years. It offers a flush-to-floor solution with elegant linear drainage for timber floors. With its outer edge of just 25 mm, the Fundo RioLigno shower element fits wonderfully into the existing wooden surface layer without cutting into floor joists or building up further height. The new wedi Fundo channel drain substructure element was especially designed for use with the new Fundo RioLigno. The pre-formed foam element guarantees reliable support and accurate aligning of the drain underneath the shower element eliminating the time consuming building and filling with mortar/screed thus speeds up the installation even further. An additional bonus: Fundo RioLigno is 100% compatible with wedi channel drains and covers as well as with slope profiles and preformed sloped lip-end sealing tapes from wedi.

wedi PreLine

The wedi building board PreLine is a fully prepared building board element for easy installation of hot water heating systems. Factory integrated recesses allow for quick and safe installation of water pipes whilst strong insulation properties of the material itself prevent heat escaping to the ground thus promote a balanced heat distribution across the entire space. Adhesion of the wedi PreLine elements to the screed floor and backfilling of the pipe ducts is done very simply with the appropriate tile adhesive (recommendation: wedi 320). It truly is the perfect element for quick and waterproof implementation of underfloor heating systems.

wedi Vapor 85

For wet rooms which are constantly under heavy strain. wedi Vapor 85 is both a panel type sealing system and a building board with structural vapour barrier properties. Thanks to the pre-integrated vapour membrane barrier applied in the factory it is perfect for challenging applications in areas with high levels of humidity.

Waterproofing,
vapour barrier
and thermal insulation

For walls, ceilings
and floors

wedi 620 sealant

For sealing in the wedi system. wedi Tools sealing tapes, sealing corners and sealing gaiters can be bonded and sealed in 1 step with wedi 620. It can also be used for sealing of wedi Vapor 85 with pre-integrated vapour membrane barrier applied in the factory and of joint areas of the wedi Subliner Dry and wedi Subliner Dry & Flex sealing and decoupling membranes.

Indispensable
in combination
with wedi Vapor 85

wedi Tools® cut-resistant tape

Cut and stab-resistant to protect the sealing. wedi cut-resistant tape is used in particular for wall/wall and wall/floor joints, as well as for expansion and contraction joints in the floor. The robust material prevents damage to the sealing when cutting out elastic sealants, e.g. with a cutter knife. It is particularly easy to use thanks to the self-adhesive strips. With a thickness of just 0.90 mm, the cut-resistant tape has little effect on the total installation height and can be perfectly integrated into any wedi sealing system.

Perfect for use with wedi
Tools sealing tapes and wedi
Tools butyl bathtub sealing tape

wedi Nonstep® ProS sound insulation fleece

Improved sound insulation with a lower installation height. wedi Nonstep ProS is a high-quality sound insulation fleece which is used under the wedi Fundo shower elements to significantly reduce water impact and footstep noises. The Nonstep ProS not only meets the minimum requirements (DIN 4109) but has also been successfully tested in the wedi system for compliance with the increased sound insulation requirements (VDI 4100). The soft and flexible material easily covers any unevenness in the floor, is moisture and rot-resistant, prevents mould growth and is recyclable.

Its thickness of just 9 mm
only slightly changes the
installation height
